

This Higher Education Achievement Report incorporates the model developed by the European Commission, Council of Europe and UNESCO/CEPES for the Diploma Supplement.

The purpose of the supplement is to provide sufficient recognition of qualifications (diplomas, degrees, certificates etc). It is designed to provide a description of the nature, level, context and status of the studies that were pursued and successfully completed by the individual named on the original qualifications to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition.

A student who leaves the university having achieved module credits rather than an award may in the future apply to De Montfort University or another higher education institution to continue their studies. This also applies to students who have achieved an interim exit award instead of their intended award. Many institutions allow applicants who have previously passed modules to apply for an exemption from studying similar modules at their institution; there may be a limit on the volume of credit which can be transferred, which will be specified by individual institutions. There may also be a time limit on whether credits previously achieved can count towards a future award, to ensure that the learning is still relevant.

1 INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

- | | | |
|-----|--------------------------------|---|
| 1.1 | Family name(s) | . |
| 1.2 | Given name(s) | Ryan Lim Xin Kai |
| 1.3 | Date of birth (day/month/year) | 29/04/2006 |
| 1.4 | Student identification number | P2930676 (DMU)
25100018832885447 (HESA) ¹ |

2 INFORMATION IDENTIFYING THE QUALIFICATION

- | | | |
|-----|--|---|
| 2.1 | Name of qualification ² | Bachelor of Science (Honours) |
| 2.2 | Main field(s) of study | Artificial Intelligence Studies |
| 2.3 | Name and status of awarding institution | De Montfort University (Leicester), a recognised body with taught and research degree awarding powers |
| 2.4 | Name and status of institution (if different from 2.3) administering studies | As awarding institution |
| 2.5 | Language(s) of instruction/examination: | English |

3. INFORMATION ON THE LEVEL OF THE QUALIFICATION

- | | | |
|-----|------------------------|---|
| 3.1 | Level of qualification | UK Bachelor Degree (level 6); European HE Area 1st cycle degree |
|-----|------------------------|---|

¹ HESA, the Higher Education Statistics Agency, the unique national identifying number for students registered at a UK university

² The power to award degrees is regulated by law in the UK.

3.2 Official length of programme

29.09.2025 - 15.07.2026

3.3 Access requirement(s)

Access to programmes at level 4,5 and 6 would normally require the completion of level 3.

4 INFORMATION ON THE CONTENTS AND RESULTS GAINED**4.1 Mode of study**

Full-Time

4.2 Programme requirements

The Artificial Intelligence (AI) programme provides a comprehensive insight and overview of some of the most utilised and popular AI paradigms, exploring both theory and practice. The focus of the programme is to provide a solid understanding of core concepts which will underpin the design and implementation of AI solutions across a variety of domains. This programme covers concepts and techniques of Computational Intelligence (CI), so that informed decisions can be made about the most appropriate combination of approaches for specific applications ranging from robotics, , scheduling, planning, inference and optimisation. The course also equips students with the knowledge of fundamentals of Computer Science (CS) and associated practical skills. This will enable students to meet the demands of the more general computing market for jobs, and also more specific AI analytical job roles, and also prepare students who wish to embark on post-graduate study. The programme aims to produce graduates with a high level of technical knowledge and ability to implement Artificial Intelligence solutions to specific problems. This knowledge will be underpinned by a thorough understanding of the current research in each of the constituent areas. The course also offers the option to spend a year in industry; the placement year (sandwich), undertaken after the second year. Providing an opportunity to work in industry, gaining a valuable real world professional experience.

First Year Topics: The following themes and topics will be covered throughout the First Year (Level 4), providing a solid foundation from which to build upon: Computer Architecture; Operating Systems; Computer Networks; Programming, Software Testing, Discrete Mathematics; Database Design; Functional Programming, Computer Ethics, Computer Law; Cybersecurity Management. Second Year Topics: The following themes and topics will be covered throughout the Second Year (Level 5), exploring in-depth a variety of soft computing and computational paradigms and techniques in addition to the Agile Team Project: Computational Intelligence; Computer Systems; Neural Networks; Evolutionary Systems; Natural Language Processing; Intelligent Robotics; Sensors and Actuators; Computer Vision; Reinforcement Learning; AI Modelling Techniques; Autonomous Systems; Cognitive Systems; Swarm Intelligence; Agile Team Project. Final Year Topics: The following themes and topics will be covered throughout the Final Year (Level 6), further expanding upon computational concepts and AI paradigms in addition to the Development Project: Agent-Based Modelling; Parallel Computing; Big Data; Machine Learning; Bayesian Inference; Data Mining; Ethics of AI; Statistical Distributions; Regression; Fuzzy Logic; Inference Systems; Knowledge Based Systems; Development Project.

4.3 Programme details, and the individual marks and credits achieved

RESULTS

2025/26				Level	Credits	ECTS ³	Weighting	P/F ⁴	Mark ⁵	Attempt ⁶
L4	RPL credits Level 4			4	120	60.0				
L5	RPL credits Level 5			5	120	60.0				
Total Credits	0	APEL credits	240				Compensating Credits	0		
2025/26				Level	Credits	ECTS ³	Weighting	P/F ⁴	Mark ⁵	Attempt ⁶
CTEC3702	Big Data and Machine Learning 0001 Phase Test 0002 Other Coursework			6	30	15.0		P	81	1
							30%		92	
							70%		76	
Total Credits	30	APEL credits	0				Compensating Credits	0		
2025/26				Level	Credits	ECTS ³	Weighting	P/F ⁴	Mark ⁵	Attempt ⁶
IMAT3721	Agent-Based Modelling and Parallel Computing 0001 Other Coursework			6	30	15.0		P	89	1
							100%		89	
Total Credits	30	APEL credits	0				Compensating Credits	0		
2025/26				Level	Credits	ECTS ³	Weighting	P/F ⁴	Mark ⁵	Attempt ⁶
CTEC3451	Development Project 0001 Project 0002 Other Coursework			6	30	15.0		P	96	1
							10%		100	
							90%		95	
IMAT3722	Fuzzy Logic and Inference Systems 0001 Report			6	30	15.0		P	55	1
							100%		55	
Total Credits	60	APEL credits	0				Compensating Credits	0		

4.4 Grading scheme

"Degree classification mark bands

The following degree classification mark bands apply to first degrees awarded by the

University:

First Class = 69.500 - 100.000

Second Class (Upper Division) = 59.500 - 69.499

Second Class (Lower Division) = 49.500 - 59.499

Third Class = 39.500 - 49.499

Pass Degree Without Honours = Not applicable

³ ECTS - European Credit Transfer System

⁴ P/F - Pass/Fail

⁵ Marks are sometimes shown as one of the following letters: P - Pass, F - Fail, X - Absent/Not awarded

⁶ Indicates the number of attempts the student made at the assessment task

Not Classified = 0.000 - 39.499

Pass = Not applicable

Merit = Not applicable

Distinction = Not applicable"

4.5 Overall classification of the qualification First Class

Classification average 84

5 INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1 Access to further study

Access to postgraduate study: Bologna FQ-EHEA 2nd cycle degree or diploma.

5.2 Professional status (if applicable)

Not applicable

6 ADDITIONAL INFORMATION

6.1 Additional Information

6.2 Further information sources

Further information can be accessed within the student section of De Montfort University's website, www.dmu.ac.uk.

7 CERTIFICATION OF THE HEAR

7.1 Date of award 15/07/2026

Date of HEAR issue 20/07/2026

7.2 Signature

N L Paine

7.3 Capacity

Registrar (Academic) and Secretary to the Board of Governors

7.4 Official seal or stamp

8 INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

Description of Higher Education in England, Wales and Northern Ireland

In England, Wales and Northern Ireland⁶, higher education institutions are independent, self-governing bodies active in teaching, research and scholarship. They are established by Royal Charter or legislation and most are part-funded by government.

Higher education (HE) is provided by many different types of institution. In addition to universities and university colleges, whose charters and statutes are made through the Privy Council which advises the Queen on the granting of Royal Charters and incorporation of universities, there are a number of publicly-designated and autonomous institutions within the higher education sector. Publicly funded higher education provision is available in some colleges of further education by the authority of another duly empowered institution. Teaching to prepare students for the award of higher education qualifications can be conducted in any higher education institution and in some further education colleges.

Degree awarding powers and the title 'university'

All universities and many higher education colleges have the legal power to develop their own courses and award their own degrees, as well as determine the conditions on which they are awarded. Some HE colleges and specialist institutions without these powers offer programmes, with varying extents of devolved authority, leading to the degrees of an institution which does have them. All universities in existence before 2005 have the power to award degrees on the basis of completion of taught courses and the power to award research degrees. From 2005, institutions in England and Wales that award only taught degrees ('first' and 'second cycle') and which meet certain numerical criteria, may also be permitted to use the title 'university'. Higher education institutions that award only taught degrees but which do not meet the numerical criteria may apply to use the title 'university college', although not all choose to do so. All of these institutions are subject to the same regulatory quality assurance and funding requirements as universities; and all institutions decide for themselves which students to admit and which staff to appoint. Degrees and other higher education qualifications are legally owned by the awarding institution, not by the state. The names of institutions with their own degree awarding powers ("Recognised Bodies") are available for download at:

<http://www.bis.gov.uk/policies/higher-education/recognised-uk-degrees/recognised-bodies>

Higher education institutions, further education colleges and other organisations able to offer courses leading to a degree of a Recognised Body are listed by the English, Welsh and Northern Irish authorities, and are known as "Listed Bodies". View the list at:

<http://www.bis.gov.uk/policies/higher-education/recognised-uk-degrees/listed-bodies>

Qualifications

The types of qualifications awarded by higher education institutions at sub-degree and undergraduate (first cycle) and postgraduate level (second and third cycles) are described in the Framework for Higher Education Qualifications in England, Wales and Northern Ireland (FHEQ). This also includes qualification descriptors that were developed with the HE sector by the Quality Assurance Agency for Higher Education (QAA - established in 1997 as an independent UK-wide body to monitor the standard of higher education provision - www.qaa.ac.uk). The FHEQ was self-certified as compatible with the Framework for Qualifications of the European Higher Education Area, the qualifications framework adopted as part of the Bologna Process, in February 2009. Foundation degrees, designed to create intermediate awards strongly oriented towards specific employment opportunities, were introduced in 2001. In terms of the European Higher Education Area they are "short cycle" qualifications within the first cycle. The FHEQ is one component of the Credit and Qualifications Framework for Wales (CQFW). The Qualifications and Curriculum Authority (QCA), the Department for Children, Education, Lifelong Learning and Skills, Wales (DCELLS) and the Council for Curriculum Examination and Assessment, Northern Ireland (CCEA) have established the Qualifications and Credit Framework (to replace, in time, the National Qualifications Framework (NQF)). These authorities regulate a number of professional, statutory and other awarding bodies which control VET and general qualifications at all levels. The QCF is also incorporated into the CQFW. There is a close association between the levels of the FHEQ and the NQF, and other frameworks of the UK and Ireland (see 'Qualifications can cross Boundaries'

<http://www.qaa.ac.uk/standardsandquality/otherrefpoints/Qualsboundaries09.pdf>)

Quality Assurance

Academic standards are established and maintained by higher education institutions themselves using an extensive and sophisticated range of shared quality assurance approaches and structures. Standards and quality in institutions are underpinned by the universal use of external examiners, a standard set of indicators and other reports, by the activities of the QAA, and in professional areas by relevant professional, statutory and regulatory bodies. This ensures that institutions meet national expectations described in the FHEQ: subject benchmark statements, the Code of Practice and programme specifications. QAA conducts peer-review based audits and reviews of higher education institutions with the opportunity for subject-based review as the need arises. The accuracy and adequacy of quality-related information published by the higher education institutions is also reviewed. QAA also reviews publicly funded higher education provision in further education colleges.

Credit Systems

Most higher education institutions in England and Northern Ireland belong to one of several credit consortia and some operate local credit accumulation and transfer systems for students moving between programmes and/or institutions. A framework of national guidelines, the Higher Education Credit Framework for England, was launched in 2008. Credit is also an integral part of the CQFW and the QCF. It may be possible for credit awarded in one framework to be recognised by education providers whose qualifications sit within a different framework. HE credit systems in use in England, Wales and Northern Ireland are compatible with the European Credit Transfer System (ECTS) for accumulation and transfers within the European Higher Education Area, and are used to recognise learning gained by students in institutions elsewhere in Europe.

Admission

The most common qualification for entry to higher education is the General Certificate of Education at 'Advanced' (A) level. Other appropriate NQF level 3 qualifications and the kite-marked Access to HE Diploma may also provide entry to HE. Level 3 qualifications in the CQFW, including the Welsh Baccalaureate, also provide entry, as do Scottish Highers, Advanced Highers or qualifications at the same levels of the Scottish Credit and Qualifications Framework. Part-time and mature students may enter HE with these qualifications or alternatives with evidenced equivalent prior formal and/or experiential learning. Institutions will admit students whom they believe to have the potential to complete their programmes successfully.

⁶ The UK has a system of devolved government, including for higher education, to Scotland, to Wales and to Northern Ireland. This description is approved by the High Level Policy Forum which includes representatives of the Department for Business, Innovation and Skills, the Scottish Government, the Welsh Assembly Government, the Higher Education Funding Councils for England, Scotland and Wales, the Quality Assurance Agency (QAA), Universities UK (UUK), GuildHE and the National Recognition Information Centre for the UK (UK NARIC).
